

MAGNIFICENCE MAGNIFIED

REDISCOVER GRANDEUR

Introduced in India by Classic Marble Company, Quadra masters the art and craft of transforming contemporary living spaces with majestic and deluxe Porcelain slabs. Inspired by the symmetry and perfection in nature, is a collection that meets the highest standards of innovation. European quality raw materials meet advanced technology and stringent quality control to create breathtaking masterpieces that are expressions of **magnificence, magnified.**

Masterpiece Designed Surfaces

Quadra is any surface you want it to be. Inspired by Mother Nature, Quadra surfaces are created using complex technological advancements that can convincingly emulate Stone, Marble, Quartz, Concrete, Wood and anything one can imagine. Quadra is produced in large sizes, that are 12mm thick:

- 3200mm x 1600mm
- 3000mm x 1500mm

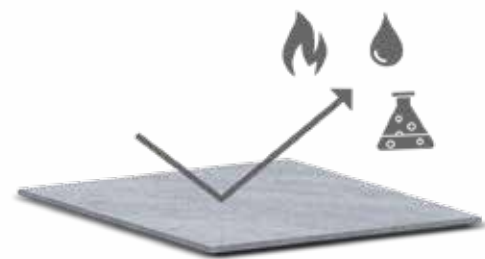

Availability Assurance and Diverse Installation Methods

Quadra surfaces are readily available with assured digital randomness in patterns and consistency in sizes - a great advantage over natural stone or wood products. The 12mm thickness of the surfaces allows for easy installation as glass curtain walls, internal walls, floors, staircases, tabletop and countertop applications.

Low Maintenance, Non-Porous Surfaces

The non-porous surfaces are crafted to perfection by exposure to extreme heat and pressure. The ultrafine particles unify to form a non-fading, chemical, fire, dirt, scratch and stain resistant surface, that does not need to be polished or coated like natural surfaces.

Maximum Strength and Durability

Quadra's high-density surfaces are created through a 'Sinterization' process, developed in Italy. Sinterization, derived from the term Sintering, is the process of compacting and forming a solid mass of material by heat and pressure. It helps in considerably reducing the porosity, enhancing the strength and durability, electric and thermal conductivity of the material. Quadra's surfaces are non - porous and resistant to moisture, stains and dirt because there simply aren't any pores left for the moisture, liquids, or dirt to enter.

Emperador Gold

Environmentally Sustainable

Lighter than conventional stone products, Quadra surfaces are created using natural reserved water and natural gas resources. The reduced weight makes for easy transportation, greater energy conservation and reduced CO₂ emissions.

Quadra Finishes

1. Shiny Polished Surface
A naturally buffed mirror-like surface, akin to polished natural stone.
2. Matte Surface
A natural non-polished, light-absorbent surface with consistent colour and tone transitions.
3. Matte Structured Surface
A subtly textured surface that mimics the textures found in nature.

ADDING GRANDEUR TO KITCHENS

Choosing the right countertop for kitchens can be a challenge, but not anymore. Quadra specializes in providing extra large slabs for your luxurious high end design projects. Quadra's full body porcelain slabs are ideal for kitchen countertop applications with unmatched surfaces that emulate the look of any natural surface. Suitable for direct contact with food, Quadra surfaces are ideal for interior and exterior use as walls, facades, floors, furniture, table and bench tops, terraces, back splashes and water features. With several years of experience in the production of porcelain tiles, Quadra surfaces are available in a wide range of colours and finishes. Created using the latest 3D digital dry decoration printing with the use of highly sophisticated Italian technology.

ULTIMATE DESIGN SURFACE

STANDARD REFERENCE - ISO 13006	TEST METHOD	STANDARD REQUIREMENT	<div>QUADRA</div> <div>ULTIMATE DESIGN SURFACE</div>
Length and width admitted deviation, in %, of the average size of each piece from the production dimensions	ISO 10545-2	± 0,60 %	± 0,15 %
Admitted deviation, in %, of the average thickness of each piece from the production dimensions	ISO 10545-2	± 5 %	± 5 %
Maximum straighness deviation, in %, in relation to the corresponding production dimensions	ISO 10545-2	± 0,5 %	± 0,1 %
Maximum right-angle deviation, in %, in relation to the corresponding production dimensions	ISO 10545-2	± 0,5 %	± 0,2 %
Flatness (Curving in the middle, corner and warping)	ISO 10545-2	± 0,5 %	± 0,2 %
Surface quality	ISO 10545-2	At least 95% of the pieces must be free from visible flaws	Conforming
% Water absorption	ISO 10545-3	< 0,5 %	< 0,1 %
Breaking strength in N	ISO 10545-4	≥ 1.300	> 2.000
Flexural strength test (MOR) in Kg/cm2	ISO 10545-4	≥ 350	≥ 400
Resistance to abrasion of glazed pieces	ISO 10545-7	See manufacturer's declaration	Class III-V
Thermal shocks resistance	ISO 10545-9	Requested	Resistant
Glaze crazing resistance	ISO 10545-11	Requested	Resistant
Frost resistance	ISO 10545-12	Requested	Resistant
Resistance to low concentrations of acids and alkalis	ISO 10545-13	See manufacturer's declaration	GLB
Resistance to domestic chemical products and additives for swimming pools	ISO 10545-13	Class B min.	GA
Resistance to staining	ISO 10545-14	Available testing method	Class III
Release of hazardous substances	ISO 10545-15	Declare value for GL surfaces used on worktops	Absent
