PORCELAIN SLIM SLABS

Experience Techlam Porcelain Slabs - a unique range of technologically advanced Spanish tiles sourced in the country, exclusively by Classic Marble Company. Enabling architectural innovation & evolution in designing, this brand of large-sized tiles - is a sample of sheer brilliance, leading its category across the globe.

Aesthetically designed to add finesse & style to your living space, the 3000 X 1000 mm tiles accentuate elan across surfaces & spaces - with designs that add texture to your imagination.

Characterized by its high performance & a sturdy nature, the tiles epitomise strength, flexibility, adaptability & are lightweight too with a quintessential classic finish that pleases the eye.

With an extraordinary sleek build (tile thickness of 3mm / 5 mm) and a lustrous smooth finish, every piece is an art. Adorn your spaces- residential & commercial alike - & let the porcelain slabs express.

Turn your living space into a canvas and let your imagination free. These extraordinary Porcelain slabs partner your creative vision to create the most stunning effect.

Fire resistance	Commission Decision 96/603/EC	Test method is available	A1 (Fire resistant)
Resistance (coefficient of restitution)	UNE EN ISO 10545-5	Test method is available	0,77
Stain resistance	UNE EN ISO 10545-14	Test method is available	Class 5. Stains cleaned with hot water
Slip resistance (fiction coefficient)	UNE ENV 12633	Test method is available	Rd 26 (Class 1)
Resistance to termal shock	UNE EN ISO 10545-9	Test method is available	No visible defects

TECHLAM®. Is a 100% natural product.

- The manufacturing process uses mineral-based raw materials, and none which are organic and petroleum-based.
- Does not give off any substances into the surrounding environment.
- Electrical energy used in the firing processes, the most environmentally sound type.
- Can be molded and recycled in other production processes.
- Less energy is consumed per square meter than a conventional tile due to the 3 mm. thickness, compared to 10 mm in a regular tile.
- Because they weigh so little, we can toad up to 3000 m2 in a container or truck. We save a great deal of energy in shipping.
